● ABOUT ME

Software engineering graduate with a strong passion for creating high-quality, user-friendly applications. Experienced in web development, working in team environments, utilizing Git and Jira. Eager to contribute to team success while continuously expanding my skill set.

● EDUCATION AND TRAINING

02/02/2019 – 30/12/2022 Dhaka, Bangladesh

BSC IN SOFTWARE ENGINEERING Daffodil International University

● WORK EXPERIENCE

JR. SOFTWARE ENGINEER – MINISTRY OF PUBLIC ADMINISTRATIO – 01/06/2024 – Current

- Built pixel-perfect, responsive, and accessible user interfaces across large-scale **React** applications.
- Improved performance by achieving **90% Core Web Vitals**, reducing **bundle size by ~40%**, optimizing load time, and UI interactions.
- Reduced development time by **25%** by creating reusable React components and modular form structures.
- Reduced load time by **60%** through lazy loading and reduced bundle size.
- Optimized **API integration** by aligning contracts with backend teams, cutting integration errors by **35%**.
- Delivered **pixel-perfect, responsive UIs** by converting Figma designs to code with Bootstrap/CSS, achieving a **100% stakeholder satisfaction** rate.
- Supported nationwide deployment through technical documentation, user training, and iterative feedback for 5,000+ users.

GRADUATE SOFTWARE ENGINEER – KONA SOFTWARE LAB LIMITED – 01/09/2022 – 30/06/2024

- Translated **Figma** design into pixel-perfect, responsive templates using **HTML, CSS, and JavaScript**.
- Implemented front-end **changes based on client and team requests**.
- Fixed **iOS mobile web bugs** in a React app by isolating platform-specific issues, reducing user-reported errors **by 30%**.
- Part of **manual testing** of the application before every sprint release.
- Built responsive UIs in React using CSS Flexbox and media queries, improving mobile usability scores **by 40%**.
- Independently developed a complete management system, handling all aspects from design to deployment.

● SKILLS

Language

TypeScript | JavaScript

Libraries & Frameworks

React | NextJs | Bootstrap and Tailwind CSS | Material UI

Tools & Platforms

Git/Github, Docker, Gitlab | Postman | Jira | Jenkins | Figma (Base) | Firebase

Features

Custom Hooks | Context API | Forward Refs | Higher-Order Components | Dynamic Forms | React Suspense + React Lazy | Error Boundaries | UseMemo | useCallback | Code Splitting

● PROJECTS

01/06/2024 – CURRENT

Government Employee Management System, (Gems)

A program under the Ministry of Public Administration of Bangladesh aimed at modernizing public service management

Modules I contributed to and developed

- ACR (Annual Confidential Reports)
- PMS (Performance Management System)
- Meeting Minutes
- Facility Service -
 - Welfare
 - Pension & PRL
- Home
- APS/DMS (Approval Processing System)
- OMS (Organization Management System)
- EMS (Employee Management System)

01/09/2022 – 01/06/2024

Cryptrade, Cryptocurrency Trading Platform

Cryptrade is a trading platform focusing exclusively on cryptocurrency trading, representing what you can trade on a crypto exchange.

Gadget Lagbe, E-commerce Website

Developed a user-friendly E-commerce Shopping Website with responsive design and product catalog management, demonstrating proficiency in front-end development.
